IN REPLY REFER TO:

3809
(UT-050)
UTU-79909

August 21, 2003

Mr. Lynn Kunzler
Division of Oil, Gas and Mining
P. O. Box 145801
Salt Lake City, Utah 84144-5801

Dear Lynn:

Enclosed is a complete notice from Sandy Nell, as filed under the 43 CFR 3809 regulations. This site is one that the Division of Oil, Gas, and Mining inspected on August 6, 2003.

Since that inspection, the drill hole locations that were proposed in the field have been clarified from what I understood during the field review. Drill holes F and G are not on the access road, but on the ridge above the road. Holes A-E that I had believed were on the ridge above the road are further west at a higher elevation. Drill hole H will not be drilled until drill holes A-G are drilled and evaluated, because some minor road construction will be necessary to access that site at the old side cut.

Mr. Nell has been requested to flag the drill sites, so the Bureau Archeologist may inspect the sites.

I have also enclosed an inspection report and other supporting documents that I prepared for my review of the proposal.

If you have any comments or questions, please call me at (435) 896-1522.

Sincerely,

Michael K. Jackson
Geologist
